International Journal of Computer Science and Security (IJCSS)

ISSN - 1985-1553

<http://www.cscjournals.org/journals/IJCSS/description.php>

International Journal of Computer Science and Security (IJCSS) is a peer review open access journal publishing the state of the art research in computer science and computer security technologies. IJCSS considers any material dealing primarily with the technological aspects of computer science and computer security. Subjects covered include: computer engineering, computer graphics, computer networks, computer security, cryptography, operating systems, programming languages, theory, design, implementation, analysis and many other topics relevant to computer science and security.

By publishing the original research papers & industrial experience-analysis studies and reports, the journal is targeted to be read by developers, designers, computer engineers, software engineers, academics, scholars, advanced students, practitioners, and computer security themes.

IJCSS invite specialists, researchers, scientists, designers, computer engineers, software engineers, academics, scholars from the fields of computer science and computer security to share their understanding and contributions towards scientific applications

IJCSS intends to provide its researchers and academics the latest and remarkable researches made by different scientists and industrial experts by providing free access to the published articles.
